

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 1st Term Examination, 2020.
URP 4161
(Project Planning and Management)

Full Marks: 120

Time: 1.5 hrs

- N.B.**
- i) Figures in the right margin indicate full marks.
 - ii) Answer any **two** questions from each section in separate script.
 - iii) Assume data where necessary.

Section – A

1. (a) Define and classify projects from multiple perspectives with appropriate examples. (10)
(b) Discuss the Initiation and Planning phases of project cycle management. (20)
2. (a) Distinguish between project monitoring and evaluation with necessary examples. (10)
(b) Discuss various types of evaluation of project with appropriate example. (20)
3. (a) Discuss important steps/procedures of a stakeholder management plan of a social project with necessary examples. (15)
(b) Draw your concept on “Project vs. Program”. (05)
(c) Differentiate between economic feasibility and financial feasibility of a project with examples. (10)

Section – B

4. (a) Define: (06)
i. Annuity, ii. Ordinary Annuity, iii. Annuity Due
(b) Mention different types of cash flows with necessary examples. (09)
(c) A firm borrows BDT. 1,500,000 at an interest rate of 20% and it has to be repaid in 6 equal installments payable at the end of each of the next 6 years. Prepare a loan amortization schedule for the given problem. (15)
5. (a) Illustrate different sources of risk in a project in short. (05)
(b) The expected cash inflows (in BDT.) of the following two projects are given below, each of which requires an initial investment of BDT. 50 million. (25)

Year	Project M	Project N
1	12	36
2	20	25
3	35	20
4	38	12

- i. Calculate IRR and Discounted payback period of the above two projects, if the cost of capital is 15%.
 - ii. If you need to choose a particular project between M and N, which project would you choose and why?
6. (a) Differentiate between equity share and preference share. How the time horizon for a cash flow analysis usually established? (15)
(b) Suppose, Khulna Shipyard Road has to be reconstructed. Now, make a logical framework (Log-frame) as part of Development Project Proposal (DPP) for reconstruction of the mentioned road. (15)

Department of Urban and Regional Planning
BURP4thYear 1stTerm Regular Examination, 2020

URP4171
(Legal Basis of Planning)

Full Marks: 120

Time: 1:30 hrs

- N.B.** i) Answer any TWO questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) "Legal aspect is a significant tool for controlling unplanned urban growth" - (15)
elaborate with appropriate example in this regard.
- (b) "Planning laws are not properly executed in Bangladesh" - identify problems (15)
associated with this issue. Use Proper example.
2. (a) Emergency acquisition is practiced in which particular situation in our country? (15)
Write about the entire procedure followed in Emergency Land Acquisition.
- (b) Write about the penalties imposed on the violation of regulations associated (15)
with land acquisition. Explain the importance of its necessary re-arrangements.
3. (a) Make a brief overview on the new town development process according to (15)
"New Town Act 1981 (Local Authority Oversight) Regulations 2018".
- (b) Discuss the significance and features of the following two regulations in urban (15)
planning:
(i) Private Housing Project Land Development Rule, 2004
(ii) Playground, Open Space, Park and Natural Water Reservoir Conservation
Act, 2000

Section – B

4. (a) Town Improvement Act 1953 is the legal basis towards planned urbanization of (15)
Bangladesh. Explain this statement.
 - (b) Explain the regulatory process and steps of preparation of Khulna City Master (15)
Plan.
 5. (a) Briefly discuss the preparation and implementation of "Master Plan" and "Site (15)
Development Schemes" for a municipality under the Pourashava Ordinance
2010.
 - (b) Differentiate with examples the functions of an Authorized Officer and a Town (15)
Planner.
 6. (a) Briefly discuss the power and functions of KDA under the KDA Ordinance 1961 (15)
for planned urbanization and development control of Khulna City.
 - (b) (b) Write short notes on the following issues: (15)
(i) Declaration of City Area
(ii) Establishment of the Municipality.
-

URP 4111
(Utility Services and Infrastructure Planning)

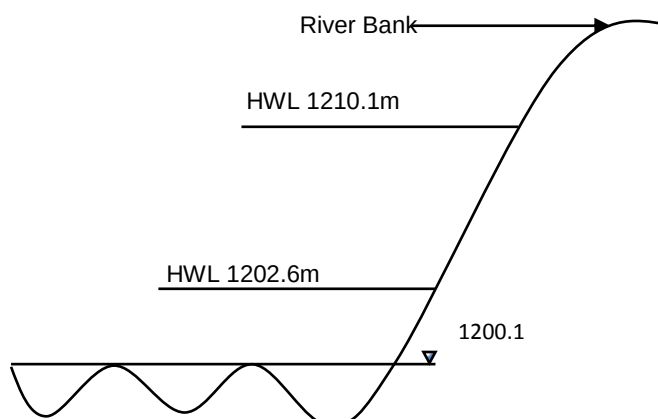

Full Marks: 120

Time: 1.5hrs

- N.B.** i) Figures in the right margin indicate full marks.
iii) Answer any **two** questions from each section in separate script.

Section – A

1. (a) Briefly discuss the components of Water Supply System with examples. (10)
(b) Give a short overview about hierarchy of collective utilities (05)
(c) Discuss the relative advantages and disadvantages of Gravitational water transmission and distribution system. (15)
2. (a) Describe the various principles and policies implemented in Bangladesh in order to achieve in sustainable water and sanitation system. (15)
(b) Estimate the average water demand for a town having 120000 population. Assume, industrial use 15%, commercial use 20%, public use 6% and livestock 12% of domestic demand. Take per capita consumption of 45 l/day and leakage 3%. (05)
(c) In a residential area of 300,000 inhabitants, the specific water demand is estimated at 150 l/c/d, which includes leakage. Calculate the demand in 20 years' time if the assumed annual demand growth is 3%. Compare the results by applying the linear and exponential models. (10)
3. (a) Discuss different types of surface water intake structure with necessary illustrations. (15)
(b) Given the following information, propose a suitable river intake. (10)
Daily demand: 8000 m³
Pump capacity: 60 l/s (working 7hours/day)

- (c) Write a short note on “Needed Five Flow (NFF)”. (05)

Section – B

4. (a) What is Unaccounted-For-Water? How does Unaccounted-For-Water reduce daily water demand? (10)
(b) Discuss some technical and policy measures of water demand management that will help you to alleviate water crisis in Bangladesh. Give examples as needed. (20)

5. (a) How the infrastructures act in market power and externalities? Illustrate with relevant examples. (15)
(b) Describe various types of water distribution system with necessary illustrations. (15)
6. (a) Describe the conventional methods of financing operation and maintenance of infrastructure and the price establishment of it. (20)
(b) Briefly describe the demand articulation and measurement for infrastructure. (10)

BURP 4th Year 1st Term Examination, 2020.
URP 4175
(Resettlement Planning)

Full Marks: 120

Time: 1.5hrs

- N.B.** i) Figures in the right margin indicate full marks.
iii) Answer any **two** questions from each section in separate script.

Section – A

1. (a) What are the main differences between Displacement and Resettlement? As per your understanding, what is the main reason for resettlement in recent time? (15)
(b) Briefly discuss about followings: (15)
 - (i) Refugee
 - (ii) Compensation
 - (iii) Rehabilitation
2. (a) Suppose you are assigned to make a resettlement plan for a development authority. What are the main principles you must follow to execute the plan? (20)
(b) “Cash compensation is more acceptable rather than land compensation” – do you agree or not? Why? (10)
3. (a) Please narrate the facts of project affected persons in Jamuna Multipurpose bridge. (15)
(b) With the rapid urbanization, people are increasing in urban area. Is it Push Factor or anything else? Briefly discuss. (15)

Section – B

4. (a) Who are the members of the District Land Acquisition Committee (DLAC)? Explain the power and limitation of District Commissioner in reference to the size of land (as stipulated by the Acquisition and Requisition of Immovable Property Ordinance (ARIPO), 1982). (15)
(b) With reference to the “3 Dhara Notice”, mention the key steps and timeframe of land acquisition process as the ARIPO, 1982. (15)
5. (a) Explain in short the difference between land-based, wage-based and enterprise-based resettlement. (15)
(b) A rural household has 1.5 bigha land with standing rice-field, 0.75 bigha fruit forest, 0.5 bigha homestead with semi-pucca structure and 0.25 bigha fish-pond. Propose a cash compensation framework as per the ARIPO, 1982. (15)
6. (a) Write short note on Grievance Redress Mechanism (GRM). What are the categories of GRM as per the World Bank Operational Policy on resettlement? (20)
(b) Formulate a step-wise Framework of GRM for squatter resettlement in your own words under the umbrella framework of the World Bank Operational Policy. (10)

URP4141
(Environmental Planning and Management)

Full Marks: 120

Time: 1.5 hrs

- N.B.** i) Answer any TWO questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Explain environmental system and its sub-systems using system theory. (10)
(b) Define and classify pollution and pollutant. Explain pollution dynamics of air pollutants. (20)
2. (a) Explain the regulatory instruments of environmental management with necessary example. (10)
(b) What is Environmental Kuznets curve? Illustrate the various market-based instruments (MBI) of environmental management with necessary example. (20)
3. (a) What are public goods? Illustrate environmental externalities with necessary examples. (10)
(b) Illustrate various (economic) values of environmental goods/resources. Explain the Contingent Valuation Method (CVM) of valuation of environmental goods/services. (20)

Section – B

4. (a) Illustrate the process of EIA with a flow diagram. (10)
(b) When is it required to conduct a full EIA? Write down the basic steps of full EIA study. (20)
5. (a) Distinguish between site clearance and environmental clearance with necessary examples in the case of EIA. (05)
(b) "Prediction of impact magnitude is a subjective approach while the determination of significance is an objective approach."- Explain with necessary example. (10)
(c) Significance of an impact = [Environmental Value x Impact Magnitude]. Explain the equation to calculate the significance of an impact on a biophysical system while conducting EIA. (15)
6. (a) Give a brief account of the genesis of the concept of Sustainable Development. (10)
(b) Discuss the role of citizen/civil society, State, and market to achieve Sustainable Development. (20)
