

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 2nd Term Regular Examination, 2020
URP 4275
(Development Planning)

Full Marks: 120

Time: 2.00 hrs

- N.B.** i) Answer any TWO questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Compare and contrast among centralized planning and indicative planning. Which one do you prefer for Bangladesh? Why? (15)
(b) “Accelerated economic growth and structural change are the two main aims of development planning”. Justify the statement with appropriate example. (15)
2. (a) What is perspective plan? Why is the perspective plan implemented through five year plans? Briefly discuss. (15)
(b) The vision of perspective plan 2010-2021 has graduated Bangladesh from least developed country to middle-income country by 2021, the Golden Jubilee Year of national independence. Evaluate this statement in terms of main sectoral development targets and their implementation. (15)
3. (a) What are the guiding principles of development planning in Bangladesh? (05)
(b) Briefly discuss three mostly important SDGs related with the Urban and Regional Planning. (15)
(c) What are the functions of General Economic Division and Physical Infrastructure Division? (10)

Section – B

4. (a) Discuss the historical evolution of the concept “Development” with necessary example. (15)
(b) How does the globalization affect the development of the Global South? Discuss with necessary example. (15)
5. (a) Discuss Walter Rostow’s stages of (economic) growth model with necessary example. (15)
(b) Illustrate the core-periphery theory with necessary example. (15)
6. (a) Compare and contrast among the dependency theory and the modernization theory. (15)
(b) Discuss Michael Todaro’s Rural-Urban migration model with necessary example. (15)

URP 4217
(Coastal and Special Zones Planning)

Full Marks: 120

Time: 1.5 hrs

- N.B.** i) Answer any THREE questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) “Erosion process influences the formation of various costal landforms.” – State (15)
the process with proper examples and figures
(b) How does ‘Stokes law’ work on sediment particles? (15)
2. (a) Define Rip waves, Hydraulic action, Abrasion and Attrition as costal process. (15)
(b) Define ocean wave actions and wave breaker patterns with necessary (15)
diagram.
3. (a) Define some of the coastal processes that are observable in Bangladesh. (15)
(b) Find out (i) Flood Return Period, (ii) Draw cross section of an embankment and (15)
(iii) Find out its area using the below information:
Highest Flood Level = 25m
Average ground level of riverbank = 15.6m
Free board = 85 cm
Crest width = 5m
Riverside slope 1:4 and countryside slope 1:3
Setback distance 50m
Probability of occurrence = 0.08

Section – B

4. (a) “Coastal zone management is essential for Bangladesh” - explain the (15)
statement with necessary example. Briefly describe Integrated Coastal Zone
Management Plan (ICZMP) Project in this regard.
(b) Briefly state the methodology and strategy of ICZMP Project. (15)
5. (a) Provide an in-depth description of the resources available and their issues in a (15)
coastal zone.
(b) Differentiate between the various types of vulnerabilities in a coastal zone. (15)
Explain the Economic Vulnerability Index with the help of a suitable example.
6. (a) Why do people change land use and what are the changes that take place? (15)
Explain why it is not easy for everyone to shift from rice to shrimp land use.
(b) What are some of the ecological issues and sources of pollution with regards to (15)
biodiversity? Mention some of the “critical habitat” types.

URP 4223
(Urban and Regional Economics)

Full Marks: 120

Time: 1.30 hrs

- N.B.** i) Answer any TWO questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) What are the diseconomies of urban agglomeration? Explain the consequences of diseconomies of urban agglomeration along with improved transportation system on modern urbanization trend. (15)
- (b) Suppose there are only two countries in the world, Bangladesh and South Sudan. Following table shows the two countries labor output and opportunity cost per unit. (15)

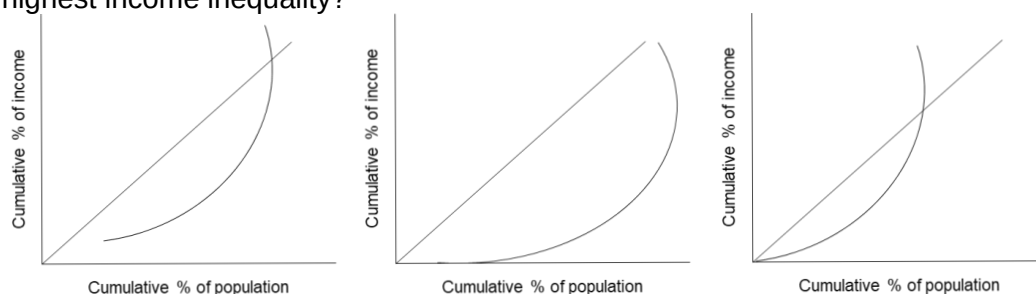

Products	Output per day per worker		Opportunity cost per unit of output	
	Bangladesh	South Sudan	Bangladesh	South Sudan
Car	2	1/4	3 Textile	1/2 Textile
Textile	6	2	1/3 Car	1/8 Car

Explain in short the consequences/ industrialization process of two countries.

2. (a) Explain the Von Thunen's concentric circle of land use. Also explain how the concentric circle is adjusted for intersecting routes. (15)
- (b) Following table shows four possible industries sites in three different growth scenarios: recession, moderate growth and high growth. Show the best site for the industry based on regret matrix. (15)

Payoff matrix (in million)			
Site	Recession	Moderate growth	High growth
Site 1	50	65	70
Site 2	40	65	80
Site 3	30	50	65
Site 4	20	45	50

3. (a) Write short note on the concept "urbanization of poverty" with reference to the urbanization trend in growing economies. (10)
- (b) Explain the major reason of sub-urbanization with reference to core city problem in Bangladesh. (08)
- (c) Explain the concept of Lorenz curve and identify which one of the following has highest income inequality? (12)

Section – B

4. (a) Narrate the scope of Urban and Regional Economics in field of planning. (10)
- (b) "Region is a spatial sub-unit of a nation" – Justify the statement with examples. (10)
- (c) Explain the factors of "Regional Growth" with required examples. (10)
5. (a) What is meant by Minimum Share Region? Make a comparison between location quotient approach and minimum requirements approach in regional growth management. (20)
- (b) Elaborate the role of Multiplier effects in regional and national economics. (10)
6. (a) Discuss the concept of New Trade theory with its significance in regional policy making. (15)
- (b) Narrate the life cycle of International product through the product life cycle theory. (15)

URP 4243
(Hazards and Disaster Management)

Full Marks: 120

Time: 1.5hrs

- N.B.**
- i) Figures in the right margin indicate full marks.
 - ii) Assume reasonable value for any missing data.
 - iii) Answer any two questions from each section in separate script.

Section – A

- 1(a) “The COVID-19 has led to a dramatic loss of human life worldwide and presents an unprecedented challenge to public health, food systems and the world of work”. Prepare a disaster management cycle suggesting activities to reduce the adverse impact of COVID-19 in Bangladesh. (20)
- 1(b) “Disaster management system of Bangladesh is more reactive than proactive”- Explain with reference to current COVID-19 situation in Bangladesh. (10)
- 2(a) Suppose you resides in an unplanned residential area of Khulna city. Specify your exposures and adaptive capacities regarding urban flooding. (15)
- 2(b) “Evacuation is a vital part of emergency operation” - Write about the problems and measures required for addressing those problems associated with conventional evacuation procedure in Bangladesh. (15)
- 3(a) Linkage between “Disaster Management Planning” and “Development Planning” is very crucial for achieving sustainable development of Bangladesh –Justify with required example. (15)
- 3(b) Make a comparison between “Hyogo Framework” and “Sendai Framework” of disaster management considering particular aspect “Priorities for Action”. . (15)

Section – B

- 4(a) Explain the statement “Prevention is better than cure” with relation to the necessity of linking different phases of disaster while preparing the disaster management plan. (12)
- 4(b) “Disaster related activities of one phase in disaster management cycle have consequences on other phases”-Clarify with necessary example. (18)
- 5(a) Why does the lack of clear national policy lead the counter disaster management plan to become ineffective? (12)
- 5(b) Describe in short the applications of GIS for assessing the risk of different hazards with essential examples. (18)
- 6(a) There are close relations among “Disaster Risk Management”, “Disaster Risk Reduction” and “Disaster Risk Assessment” but there are differences in meaning, tasks and approach –clarify with essential example. (15)
- 6(b) Explain the “Risk Governance Framework” concerning disaster risk assessment and risk management with a necessary sketch. (15)

BURP 4th Year 2nd Term Regular Examination, 2020
URP 4273
(Urban Governance)

Full Marks: 120

Time: 1.5 hrs

- N.B.** i) Answer any TWO questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Define governance in your own words. Why there is a shift from government to governance? (15)
(b) What are the major components of good governance? Mention two criteria for measuring each component. (15)
2. (a) What is the complex adaptive system (CAS)? Explain the CAS in light of the measures taken by the KUET authority to restore academic activities during the COVID-19 pandemic. (20)
(b) “The adaptive capacity of a government can be challenged through different emerging issues”. Elaborate the statement with necessary example. (10)
3. (a) Define social development. Why good governance is in the forefront of social development? (15)
(b) What are the major campaigns of good governance worldwide? What are the major issues of good governance in Bangladesh? (15)

Section – B

4. (a) Suppose Mr. X works in a government office. He noticed that the government system is not functioning well in the office. More specifically the new appointment procedure of manpower hampered seriously after maintaining different actors of governance processes. Then he is very interested to solve the problem but now his position is in the last tier of citizen participation ladder. Given the above situation, address the following two questions. (20)

Why the good governance is necessary for the office? “Governance: Goes beyond the Government”- how can you relate it with the appointment procedure of the office?
(b) Please specify Mr. X’s position in the ladder and how he can solve the problem as per your understanding. (10)
5. (a) What is the difference between output indicators and outcome indicators? Briefly discuss about the attributes of indicators for measuring governance. (20)
(b) Please write down the different models of data collection and among them which one is very potential for capturing remote area’s data? (10)
6. (a) Draw a comparison matrix with the details of WGI, UGI, LGB and citizen report card. (15)
(b) Why citizen report cards are used widely? Briefly discuss the methodological process of citizen report card. (15)
