

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 2nd Term Regular Examination, 2021
URP 4243
(Hazardous and Disaster Management)

Full Marks: 210

Time: 3.00 hrs

- N.B.** i) Answer any three questions from each section in separate script.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Explain the followings with necessary example. (10)
(i) Hazard; (ii) Disaster; (iii) Emergency
- (b) Classify hazards from various perspectives and discuss three important disasters. (15)
- (c) Discuss the vulnerability of Bangladesh to various hydro-meteorological disasters. (10)
2. (a) Draw your concept on disaster management cycle and illustrate it with necessary example. (15)
- (b) What is changing paradigm in disaster management? Discuss with necessary example. (08)
- (c) Discuss various structural and non-structural measures of disaster management in Bangladesh. (12)
3. (a) Discuss in brief the likely scenario of climate change and its impact in Bangladesh. (08)
- (b) Discuss the salient features of National Adaptation Plan of Actions (NAPA) of Bangladesh. (12)
- (c) Discuss the main features of Bangladesh Climate Change Strategies and Action Plans (BCCSAP). (15)
4. (a) Draw your concept on SOD. (08)
- (b) Make a summary of the role of local level stakeholders in Disaster Management as per the SOD in Bangladesh. (15)
- (c) Briefly illustrate the CDMP and Sendai Framework of Action. (12)

Section – B

5. (a) What is counter disaster plan? (08)
- (b) Explain in brief the key elements of a disaster plan. (15)
- (c) What are the critical areas to be considered while preparing the disaster management plan? Discuss in brief. (12)
6. (a) How is flood hazard intensity estimated? Explain in brief. (10)
- (b) How GIS and RS could be used for risk assessment of different hazards? Discuss with necessary example. (15)
- (c) “Risk is a multi-disciplinary spatial problem” - Explain the statement with necessary example. (10)

7. On average, cyclones happen about 2 times a year in Bangladesh. The hardest hit regions are Dhaka, Khulna and Barisal. The most severe cyclone to make landfall in Bangladesh in the past 12 months was Sitrang. At least 9 people had died after Cyclone Sitrang slammed into Bangladesh's southern coast, snapping communications and power links and destroying houses.

Read the aforementioned statement and answer the following questions.

- (a) Which parameters can help to determine the strength of Cyclone Sitrang? (10)
- (b) Where and how cyclone Sitrang is formed? Explain with proper figures. (10)
- (c) What are the components of Cyclone Master Plan? How can the damaging effects of a cyclone like Sitrang be lessened? (15)

8. Suppose, you are assigned as a Planner on the landslide susceptibility mapping project in the hilly region of Bangladesh. Landslide susceptibility mapping is the sub-division of the terrain into zones that have a different likelihood for landslide occurrence.

Read the aforementioned statement and answer the following questions.

- (a) What are the purposes of using technology for disaster risk reduction? (08)
- (b) Explain the contexts, applications and issues to be considered while choosing appropriate technology for any kind of hazard assessment. (12)
- (c) What data is required for mapping landslide susceptibility? How to perform historical and heuristic landslide hazard analysis using those data? (15)

Khulna University of Engineering & Technology
Department of Urban & Regional Planning
BURP 4th Year 2nd Term Examination, 2021
URP 4273
(Urban Governance)

Full Marks: 210

Time: 3 hrs

- N.B.** i) Figures in the right margin indicate full marks.
ii) Answer any **three** questions from each section in separate script.

Section – A

1. (a) What is the basic difference between the concepts of “government” and “governance”? Why was it necessary to adopt the concept of “governance” and “good governance” (12)
(b) Khulna Development Authority (KDA) is planning a road expansion project which will displace street vendors. Identify the major stakeholders of the project and draw their respective position in the governance component framework. (13)
(c) There are eight indicators of good governance. Draw a conceptual framework for quantitatively measuring good governance. (10)
2. (a) Land for housing has been a major concern for Dhaka city. From the perspective of governance, mention the major stakeholders of land for housing development in Dhaka city. (15)
(b) How the power-structure dominates the overall land for housing in the peripheral parts of Dhaka? Explain how such power structure ultimately fails in ensuring good governance. (20)
3. (a) What are the emerging issues that require a Complex Adaptive System (CAS) of governance, and why? (10)
(b) There are four characteristics of CAS: agents, self-organization, co-evolution and shifting system behaviour. With reference to a case study, explain how these four characteristics negotiate in different decision-making process. (25)
4. (a) What are the major campaigns of good governance in the world? Explain how those prioritize different aspects of governance and indicators. (14)
(b) Write short notes on the following: (21)
 - Major problems of good governance in Bangladesh
 - Network based governance.
 - State dominated government

Section – B

5. (a) Describe the formal and informal actors of governance. How do the informal actors influence the formal actors? (15)
(b) Show Sherry R Arnstein’s “Ladder of Citizen participation” with the help of a diagram. (10)
(c) Good governance needs to be responsive, transparent and consensus oriented. Why? (10)

6. (a) Briefly describe the indicators to measure governance. (10)
- (b) Mention the types of assessment and modes of survey data collection for Governance. Further mention some sources of Governance Data. (15)
- (c) Briefly explain Unobserved Components Model (UCM). (10)
7. (a) Show the reporting format for UGI and LGB. (05)
- (b) Show the differences between UGI and WGI. (10)
- (c) What are the strengths and weakness of UGI? (10)
- (d) Calculate and explain the UGI for the following data: (10)
- Effectiveness sub-index = 0.54
 - Equity sub-index = 0.63
 - Participation sub-index = 0.47
 - Accountability sub-index = 0.91
8. (a) What are the strength and weakness of Citizen Report Cards. (10)
- (b) Describe the methodology of Local Governance Self-Assessment. (10)
- (c) How can we break the spiral effect of inefficient urban governance in urban development? (15)

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 2nd Term Regular Examination, 2021
URP 4275
(Development Planning)

Full Marks: 210

Time: 3.0 hrs

- N.B.** i) Answer any three questions from each section in separate script.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Draw your concept on development planning. (08)
(b) “Accelerated economic growth must be followed by distributive justice.” Explain the statement. (12)
(c) Indicative planning is regarded as the mostly followed planning system for many of the countries at global level. Critically evaluate this statement in comparison with the central planning system. (15)
2. (a) What is Bangladesh Delta Plan? (05)
(b) Discuss the functions of General Economic Division of the Planning Commission. (10)
(c) Analyze the Delta Scenarios of BDP 2100 in terms of development planning of Bangladesh. (20)
3. (a) What is Perspective Plan? (04)
(b) Write down the objectives of PP2041 for the environmental sector of Bangladesh. (10)
(c) Write short notes on the followings (any three): (21)
i) Bangladesh Vision 21; ii) National Biodiversity Strategy and Action Plan; iii) Controlling of noise pollution for national development; iv) Special Economic Zones and Improved Land Usage.
4. Write short notes (any five) (35)
a) Real GDP and Nominal GDP
b) Structure of Planning Commission
c) ToR of ECNEC
d) Functions of Physical Infrastructure Division
e) New Urban Agenda
f) Future Orientation Index
g) Happy Planet Index.

Section – B

5. (a) Put your argument if “Development” is a process or outcome. (08)
(b) Discuss the historical evolution of the concept- Development (15)
(c) Substantiate the idea-“Development as freedom”. Discuss the gender dimension and human right perspective of development. (12)
6. (a) Draw your concept on basic needs paradigm of development. (08)
(b) Discuss the basic pillars/ dimensions of sustainable development. Illustrate important principles and action areas of sustainable development. (15)
(c) Draw your concept on globalization. How does globalization affects the development of developing world/global south. (12)
7. (a) Illustrate in brief the Harris-Todaro model of Labor Migration. (10)
(b) Discuss WW Rostow’s Stages of Growth theory of development with necessary example. (15)
(c) Critically evaluate the Balanced and Unbalanced theory of Growth. (10)
8. (a) Draw your concept on development governance. (08)
(b) Discuss various types of development governance and types of decentralized governance. (15)
(c) Discuss various dimensions of good governance with necessary example. (12)

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4thYear 1st Term Examination, 2022
URP 4175
(Resettlement Planning)

Full Marks: 210

Time: 3.00 hrs

- N.B.** i) Answer any THREE questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Write down the differences between displacement, resettlement, and rehabilitation. (09)
(b) If you are a “Resettlement Planner” then what safeguard issues will you follow while associated with an involuntary resettlement. (15)
(c) Write down the problems regarding to resettlement. (11)
2. (a) If resettlement is not done properly, what types of risk can happen. Discuss briefly. (10)
(b) Why Legal framework and Compensation given priority as first and second most important instruments of Resettlement Action Plan (RAP). (10)
Why do you think that they are given the right position on the priority list?
(c) Discuss about the facts regarding the compensation and design compensation for following resettlement conditions. (15)

3. (a) Correlate Resettlement plan with project cycle steps. (15)
(b) Write down the institutions involved in resettlement. (10)
(c) Why Resettlement Policy Framework (RPF) given more importance in Resettlement Action Plan? Write down the purposes of RPF. (10)
4. (a) Briefly discuss about the methods of valuing affected assets. (13)
(b) How you will redress the Grievances arise in the resettlement? (11)
(c) Mention the roles that can be played by project affected person in different stages of resettlement. (11)

Section – B

5. (a) “The present resettlement policies are adequate.”- Give your arguments for or against this statement. (15)
(b) What are the powers of Deputy Commissioner and Arbitrator? (05)
(c) Provide recommendation to address the loopholes for finalizing land price in 1982 ARIPO Ordinance. (10)
(d) Differentiate between act, law, bill and ordinance. (05)
6. (a) Elaborate on the Risks to displaced persons/communities after resettlement. (15)
(b) Describe the various Resettlement Planning Instruments and Financial Assistance provided to the borrower. (15)
(c) What are the policy objectives of the World Bank on Involuntary Resettlement? (05)

7. (a) Why is economic analysis essential to Resettlement? (10)
- (b) Explain the limitations of Cost-Benefit Analysis for Involuntary Resettlement. (10)
- (c) Why is Property Right an issue in the Economics of Resettlement? (05)
- (d) Explain the No-Worse-Off criterion and its legality with respect to resettlement. (10)
8. (a) What are the advantages and limitations of Grievance Redress Mechanism? (10)
- (b) According to the IRR model, mention some of the risks and their counterparts. (10)
- (c) Describe the Pressure and Release (PAR) Model. (15)

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 2nd Term Regular Examination, 2021
URP 4223
(Urban and Regional Economics)

Full Marks: 210

Time: 3 hrs

- N.B** i) Answer any three questions from each section in separate script.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) What is a city? Discuss the conditions that must be satisfied to develop a City. (10)
- (b) What is Locational Equilibrium? Explain the relationship of Price with Locational Equilibrium. (10)
- (c) What is Comparative Advantage? Following table shows data about two regions (South and North) and two products (Bread and Shirt). Calculate the opportunity cost for each region and product type with the following assumptions: (15)
 - Suppose that there are no scale economies in transportation.
 - Transport cost is independent of the volume shipped.
 - The two regions specialize only on two products

Products	Output per hr/person		Opportunity Cost	
	South	North	South	North
Bread	2	4	?	?
Shirt	2	12	?	?

Also explain the regional implication if transport cost is reduced in case of bulk shipment.

2. (a) Production is subjected to economies of Scale- Explain this statement in light of the axioms of urban economics. (10)
- (b) Discuss the concept of Factory City. How are the prices and wages determined in a Factory City? (13)
- (c) Illustrate the market area of a Factory City with examples. (12)
3. (a) What is Zoning? Explain the effects of zoning with reference to land use density, employment and wage. (12)
- (b) Suppose a city permits 100 housing per year and the equilibrium housing price is 10 million per unit in a suburb. If the city authority decides to permit 60 buildings per year, what would be effect on the housing price? Estimate the price of housing permit and demonstrate the implications such policy. (18)
- (c) (c) How can you use zoning to promote mixed land use? (05)
4. (a) How does Bid-rent theory dictate the city spatial structure? Explain with examples. (10)
- (b) Using Bid-rent theory, describe the land use patterns for Milk, Rice and Jute production area (not to scale) from the following data: (15)

Items	Production per land unit	Sell value per unit	Production cost per unit	Transportation cost per unit
Milk	60	10	8	0.2
Rice	45	8	6	0.05
Jute	35	5	3	0.025

- (c) Discuss Vernon's three stages of Product Life Cycle. (10)

Section – B

5. (a) Ideal location of industry is determined by the suitability of three aspects in “Least-Cost Approach”- explain using required diagram and example. (15)
- (b) Suppose, you are the owner of a beverage industry, which is located at an optimum location P and there are other three compromise locations A, B, C. R1 and R2 are the location of raw materials and M is the market. If you are willing to change the location of your industry, which location is you going to prefer and why? You have to keep in mind that the cost of transportation is BDT 20 Tk per unit of material. Necessary data are provided in following Figure and Table. (10)

Location of Industry	Labor Cost (in BDT)	Locational Weight
P	70,000	50
A	50,000	20
B	20,000	40
C	30,000	30

- (c) “Von Thünen's second model is concerned with land use patterns”- how so? Explain with necessary diagrams. (10)
6. (a) Write down the types of region with example. (10)
- (b) “When the total leakage is greater than the total injected into the circular flow, national income will decrease” – how so? Explain in accordance with the diagram of circular flow income model. (10)
- (c) Find the basic employment and basic multiplier for “North” industrial sectors according to the minimum requirement approach. (15)

Major Industrial Sectors	Employment			
	East	West	North	South
Wholesale trade	67,643	78,606	72,719	46,391
Retail trade	153,268	157,176	138,622	187,673
Finance and real estate	72,523	68,927	85,452	66,320
Services	239,308	365,064	266,781	311,783

7. (a) An investor has been searching for an industry at “A” county for investment purposes. They heard that Real Estate maybe a good choice for investment but are not sure. As an urban planner, how would you help them to determine this? Some necessary information is provided in following Table. (25)

Employment data of “A” County and National level for four industries

Employment Industry	“A” County (in thousands)		National Level (in thousands)	
	2017	2022	2017	2022
Manufacturing	25	35	119	128
Wholesale	33	40	573	682
Retail trade	50	65	150	140
Real Estate	18	29	199	236

- (b) “Shift share analysis breaks down regional employment growth”- to what extent do you agree with the statement? Explain. (05)
- (c) “Relocation of an established firm can result from pressures of both, internal and external to the firm”-how so? Explain. (05)
8. (a) Narrate the life cycle of international product through the product life cycle theory. (15)
- (b) “Absolute advantage and comparative advantage theories support free trade in regional economics”- Explain. (15)
- (c) Write a short note on: cost minimizing vs. profit maximizing theories. (05)
