

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 2nd Term Regular Examination, 2022
URP 4223
(Urban and Regional Economics)

Full Marks: 210

Time: 3.00 hrs.

- N.B. i) Answer any three questions from each section in separate script.
ii) Figures in the right margin indicate full marks.
iii) Assume reasonable value for any missing data.

Section – A

- 1 (a) Which urban spatial model describe the spatial distribution of Khulna city the most? (10)
Describe with appropriate examples.
(b) Critically discuss the fundamental principles of urban economics, emphasizing the (10)
axioms that govern the field.
(c) Suppose there are only two countries in the world; Bangladesh and India. Following (15)
table shows the two countries labor output and opportunity cost per unit.

Products	Output per day per worker		Output cost per unit of output	
	Bangladesh	India	Bangladesh	India
Car	2	1/4	3 Textile	1/2 Textile
Textile	6	2	1/3 Car	1/8 Car

Explain in short, the consequences/ industrialization process of two countries.

- 2 (a) Write short notes on the following: (09)
i) No scale economics ii) Factor specialization and indivisible input
iii) Riley's Law of Retail Gravitation
(b) Assess the influence of zoning laws on urban land use patterns in the lens of Bid- (15)
Rent theory. Present arguments to support or dispute the effectiveness of zoning
regulations in achieving desirable urban outcomes.
(c) Discuss the role of agglomeration economies in shaping urban landscapes. Provide (11)
arguments to support or challenge their significance in contemporary city
development.
- 3 (a) Why do large cities have higher income? (05)
(b) Following table shows net benefit of four location choices for an industry with three (20)
growth scenarios. Calculate the equal probability matrix, weighted probability payoff
matrix. Considering the regret matrix, which location choice would you suggest for
that industry, where recession= 50% probability, moderate growth= 40% , and high
growth= 10% probability.

Payoff matrix (in million)			
Site	Recession	Moderate Growth	High Growth
Site 1	50	65	70
Site 2	40	65	80
Site 3	30	50	65
Site 4	20	45	50

- (c) Explain the major reason of sub-urbanization with reference to core city problem in (10)
Bangladesh.
- 4 Write short note (any five): (35)
i) Smart Growth v) Von Thunen's Concentric Circles
ii) Urban Growth Boundary (UGB) vi) Tax breaks
iii) Urbanization economics vii) Gentrification
iv) Function-based sprawl

Section – B

- 5 (a) Why does a Planner need to study Urban and Regional Economics? (08)
 (b) "Von Thunen placed the agriculture properties correctly in the corresponding rings" – (15)
 Are you agree with this or not? Justify the statement.
 (c) Discuss about the main groups of Industrial Location Theories with necessary graph. (12)
- 6 (a) Explain the derived/modified concept of "Central Place Theory" in Industrial Location Theory with necessary assumptions. (15)
 (b) In our economy, which factor can act as growth factors and how? (15)
 (c) A major regional industry injects an extra \$20,00,000 into a regional economy through its expansion program, it will generate an extra income. If \$2,00,000 of this extra income is lost to the government via taxes, \$8,00,000 is saved and \$5,00,000 is spent on goods and services imported into the region. (05)
 i) Calculate regional multiplier.
 ii) Interpret the result.
- 7 (a) Write down the differences between absolute and comparative advantage taking Jute, Tea, Shrimp, Hilsha Fish and Ready-Made Garments as product. (12)
 (b) Explain the product life cycle theory with a practical example. (10)
 (c) According to the current economic condition of Bangladesh on which situation we are going through? Explain with the help of theory of Intervention. (13)
- 8 (a) Calculate the shift share for Padma industry based on following data (35)

Industry Category	Bangladesh Employment		Padma Industry	
	2023	2030	2023	2030
Base Commodities	635223	738,637	52688	56464
Construction	6,381,405	9,389,271	1352017	1453117
Manufacturing	14,123,022	15,197,159	4551946	4751946
Trade	20,731,685	23,931,685	4961294	5972294
Transportation	4,067,505	4,287,505	990551	997551
Service	27,914,922	29,914,922	6560181	7683181
Education and Health	16,248,798	18,258,798	4377429	4487329

URP 4275
(Development Planning)

Full Marks: 210

Time: 3.0 hrs

- N.B.: i) Answer any **three** questions from each section in separate script
ii) Figures in the right margin indicate marks
iii) Assume data if necessary

Section – A

Marks

1. (a) What is development planning? (05)
(b) How does the development planning work for the advanced structural change and economic growth of a country. Explain with appropriate examples. (20)
(c) Differentiate with example between the central planning and the indicative planning. (10)
2. (a) What is perspective plan? (05)
(b) The vision of the PP2041 is to develop Bangladesh a high-income country. Evaluate this statement in terms economic growth and stability of the development of Bangladesh. (15)
(c) Briefly discuss with example the achievement of the vision "Digital Bangladesh". (15)
3. (a) Define delta vision. (05)
(b) Critically evaluate the productive and stagnation Delta Scenarios in terms of BDP 2100. (20)
(c) Briefly discuss the institutional setup for the implementation of Bangladesh Delta Plan. (10)
4. Write short notes (any five) (35)
 - (a) Guiding principles of development plan
 - (b) Structure of the Planning Commission
 - (c) ToR of ECNEC
 - (d) Functions of General Economic Division
 - (e) Functions of Physical Infrastructure Division
 - (f) Formulation process of Five Year Plan
 - (g) Formulation process of ADP.

Section – B

5. (a) What do you mean by community development? Mention Todaro's development objectives. (08)
(b) Make a comparative analysis between economic growth and development with necessary examples. (12)
(c) Briefly discuss various dimensions of development. (15)
6. (a) Explain the classification of investment by Prof. Hirschman for explaining the theory of unbalanced growth. (05)
(b) Illustrate the dissimilarities between balanced growth theory and unbalanced growth theory. (10)
(c) Critically evaluate the stages of Rostow's Economic Growth model. (20)
7. (a) Briefly explain the Harris-Todaro Model of Labor Migration in the form of equation. (15)
(b) Provide a brief overview of the applicability of Harris Todaro Model for Bangladesh. (12)
(c) Discuss the criticism of Harris-Todaro Model in explaining migration. (08)
8. (a) Make a comparative analysis between modernization theory and dependency theory of development. (15)
(b) Explain the features of mechanical solidarity according to Emile Durkheim's concept of modernization theory. (08)
(c) To what extent is dependency theory relevant in the contemporary globalized world? (12)

BURP 4th Year 2nd Term Examination, 2022.
URP 4273
(Urban Governance)

Full Marks: 210

Time: 3.00 hrs

- N.B.** i) Answer any THREE questions from each section in separate scripts.
ii) Figures in the right margin indicate full marks.

Section – A

1. (a) Government is about “delegation of roles and responsibilities” and Governance is a “process” – Explain. (12)
(b) How is informality and community involvement a key to governance system? (10)
(c) What is the nexus between civil society and NGOs in Bangladesh? Explain the problems of civil society in a developing country like Bangladesh. (13)
2. (a) Identify the major stakeholders of a land and housing project in Khulna city. Explain how the stakeholders interact with each other and ensure a governance process for best possible location. (15)
(b) What are the key factors that determine the number of social media users in Bangladesh? Why Facebook is more popular in Bangladesh in contrast to other developed countries i.e. USA. (10)
(c) Why and how social media i.e. Facebook has become a fourth pillar governance in Bangladesh? Explain the problematic of Facebook as a mean of urban governance from the perspective of “Echo-Chamber”. (10)
3. (a) A Complex Adaptive System (CAS) has four major characteristics: Agents, self-organization, co-evolution and shifting system behavior. Explain these four characteristics in a shifting decision making of a CAS. (20)
(b) Write short notes on the following: (15)
i. Network Based government
ii. State Dominated Government
4. (a) Define social development. Why good governance is in the forefront of global campaign for development and social development. (12)
(b) What are the major campaigns for good governance? What are the World Bank indicators for good governance? (10)
(c) What are the major problems of good governance in Bangladesh? (13)

Section – B

5. (a) Describe the formal and informal actors of governance. How do the informal actors influence the formal actors? (10)
(b) Show Sherry R Arnstein's "Ladder of Citizen Participation" with the help of a diagram. (15)
(c) Describe the general dissatisfaction towards the traditional role of urban government considering attributes of good governance. (10)
6. (a) Briefly describe the various types of governance indicators with proper examples to measure governance. (10)
(b) Mention the attributes of the various types of indicators. What are the modes of survey data collection for measuring governance? (10)
(c) Describe the Unobserved Components Model and its use in governance. (15)

7. (a) Show the reporting format for UGI and LGB. (05)
(b) Explain the popularity of Citizen Report Cards and why it ought not to be so? (10)
(c) Which governance index is the best and worst based on weakness? Why? (10)
(d) Calculate, present and explain the UGI for the following data: (10)
Effective sub-index = 0.5
Equity = 0.7
Participation = 0.6
Accountability = 0.2
Majority = 0.5
- 8 (a) Give your thoughts about the Citizen report card. Can it be applicable in Bangladesh? If so, how and if not, why? (10)
(b) What are the strengths and weakness of Local Governance Self-Assessment (LGSA)? (10)
(c) With the help of a spiral diagram show the following: (15)
i. issues of urban development
ii. Break in spiral effect
iii. Urban development.

Khulna University of Engineering & Technology
Department of Urban and Regional Planning
BURP 4th Year 2nd Term Regular Examination, 2022
URP 4243
(Hazards and Disaster Management)

Full Marks: 210

Time: 3.0hrs

- N.B. i) Figures in the right margin indicate full marks.
ii) Answer any **three** questions from each section in separate script.

Section – A

1. (a) Which parameters can assist in the estimation of flood hazard intensity? (10)
(b) Briefly explain the major types of floods normally occurs and it's behind causes in Bangladesh. (10)
(c) What are the existing deficiencies available in managing flood and what measures can be taken up in this regards? (15)
2. (a) How can disaster be both a blessing and a curse for a country? (10)
(b) What vulnerability? Wealthy people are not always less vulnerable in disaster- Explain. (10)
(c) "Possible links between disaster management planning and development planning should be considered in the planning process of disaster plan" – Explain with necessary example. (15)
3. Great Bhola Cyclone did not directly cause the Bangladesh Liberation War, but it significantly influenced the socio-political landscape of East Pakistan. It heightened existing grievances against the West Pakistani government and played a crucial role in the series of events that led to the war.

Read the aforementioned statement and answer the following questions.
(a) Disaster and National Image are inherently interrelated to each other- Explain. (10)
(b) What are the components of Cyclone Master Plan? How can the damaging effects of a cyclone like Great Bhola Cyclone be lessened? (15)
(c) How does the efficacy of governmental response to natural disasters influence political stability in a region? (10)
4. The use of GIS will decrease the time for data collection, increase the time for data management, and decrease the time for data analysis significantly. We can easily analyze the flood risk through GIS.

Read the aforementioned statement and answer the following questions.
(a) Discuss how GIS could be used at various stages of the disaster management cycle. (08)
(b) Explain the contexts, applications and issues to be considered while choosing appropriate technology for any kind of hazard assessment. (12)
(c) What data could be required for generating a flood risk map? Write down the flood risk analysis steps using those data applying GIS overlay techniques? (15)

Section – B

5. (a) What is global disaster? Among the 3 models of Vulnerability Assessment rank their chronology with valid logic. (15)
(b) What type of hazard the wild fire is? Explain with proper justification. (10)
(c) What is the difference between risk assessment and risk management? State with necessary examples. (10)
6. (a) Define Risk. Write down the equations of risk. Why we use multiple equation of risk? (12)
(b) Write down the attributes of Hazard Assessment. (12)
(c) Why vulnerability is called multi-dimensional? (11)
7. (a) Draw the cyclic process of Disaster Management. Which stage of the Disaster management process is more important than others? Express your views with proper justification. (15)
(b) Draw the conceptual framework of disaster management with a practical example based on Covid-19 scenario. (15)
(c) What is the difference between “Pro-Active” and “Build Back Better” approach? (05)
8. (a) Which framework are followed in disaster management process of Bangladesh? Explain the “4 Priorities” of that framework. (12)
(b) Design a “Community Disaster Plan” in a tabular form for cyclone of wind speed 240 km/hr which will pass through Khulna’s coastal districts. (15)
(c) Write down the principles of participatory implementation process of CBDRM. (08)
-
